

**ASCE Pittsburgh Section EWRI and Sustainability Committee
Joint SMART Goal 2015-2018**

Specific – WHO? WHAT?

The ASCE Pittsburgh Section Environmental and Water Resources Institute (EWRI) and the Sustainability Committee will take an active role in promoting the Envision® Sustainable Infrastructure Rating System

<http://www.sustainableinfrastructure.org/rating/>.

Measurement/Assessment – HOW?

The EWRI and Sustainability Committee will identify, per year, two Envision® Sustainability Professionals (ENV SP) willing to present a project to our Section members. To this end, we will establish a local Pittsburgh Area ENV SP networking group by contacting all ENV SPs in the Pittsburgh region and developing an email distribution list of participants.

Attainable/Achieve – REASONABLE?

The EWRI already has several members who have taken the Envision® course and the Sustainability Committee has used the Envision® self-assessment tool as part of the South Side green infrastructure charrette. We plan to use this pool of Envision® to obtain volunteers for yearly presentations and are planning a presentation to the Green Infrastructure Network scheduled for end of 2015 to continue Envision® discussion.

Relevant – EXPECTED RESULT?

The EWRI and the Sustainability Committee will engage at least two volunteers per year willing to present a seminar highlighting Envision®'s application on a project.

Timed – WHEN?

The EWRI and Sustainability Committee will have at least two on Envision® presentations per year through 2018.
