

SUSTAINABILITY AWARD

One per year

The award is presented to an engineering project in recognition of creativity in the form of innovative sustainability. Projects may be any that demonstrate innovation in sustainability, first and foremost, demonstrating adherence to the principles of economic, social and environmental sustainability. The following criteria will be considered:

- The extent to which innovative design or construction methods improve economic, social and environmental sustainability;
- The promise shown by the innovation to extend future developments in sustainability;
- The degree to which the project extends public understanding of sustainability in construction;
- The anticipated advantages to be obtained as a result of the project;
- Within section boundaries;
- Award made for the year that the project goes into service.
